

| Field Title | Field Name | Data Type | Description |
|--------------|-------------|------------|--|
| Station Code | StationCode | Plain Text | A unique code representing the station name and site. A list of stations and station information is also available at: http://ceden.org/CEDEN_Checker/Checker/DisplayCEDENLookUp.php?List=StationLookUp |
| Station Name | StationName | Plain Text | Represents a unique sampling site. A single waterbody may have multiple stations. Station name is unique for all stations. A list of stations and station information is also available at: http://ceden.org/CEDEN_Checker/Checker/DisplayCEDENLookUp.php?List=StationLookUp |
| Project Name | ProjectName | Plain Text | The name of the project to which the sample result is associated. Generally the Project is the purpose of the monitoring. One or more stations are associated with a project though a station may be associated with multiple projects. One or more projects are associated with a parent project and one or more parent projects are associated to a program. For monitoring that occurs over several years, the project name usually contains a time element of the larger parent project or program. A list of possible options is available at: http://ceden.org/CEDEN_Checker/Checker/DisplayCEDENLookUp.php?List=ProjectLookUp |
| Project Code | ProjectCode | Plain Text | The code representing the project to which the sample result is associated. Generally the Project is the purpose of the monitoring. One or more stations are associated with a project though a station may be associated with multiple projects. One or more projects are associated with a parent project and one or more parent projects are associated to a program. For monitoring that occurs over several years, the project name usually contains a time element of the larger parent project or program. A list of possible options is available at: http://ceden.org/CEDEN_Checker/Checker/DisplayCEDENLookUp.php?List=ProjectLookUp |

| | | | |
|---------------------|-------------------|------------|--|
| Parent Project Code | ParentProjectCode | Plain Text | References the parent project that is associated with the sample. A parent project is associated with one or more projects. A list of possible options is available at: http://ceden.org/CEDEN_Checker/Checker/DisplayCEDENLookUp.php?List=ParentProjectLookUp |
| Parent Project Name | ParentProjectName | Plain Text | Name of the parent project that is associated with the sample. A parent project is associated with one or more projects. A list of possible options is available at: http://ceden.org/CEDEN_Checker/Checker/DisplayCEDENLookUp.php?List=ParentProjectLookUp |
| Program Code | ProgramCode | Plain Text | Code representing the program associated with the sample. The program is an over-arching theme of conducting monitoring. One or more parent projects are associated to a program. A list of possible options is available at: http://ceden.org/CEDEN_Checker/Checker/DisplayCEDENLookUp.php?List=ProgramLookUp |
| Program Name | ProgramName | Plain Text | Name of the program associated with the sample. The program is an over-arching theme of conducting monitoring. One or more parent projects are associated to a program. A list of possible options is available at: http://ceden.org/CEDEN_Checker/Checker/DisplayCEDENLookUp.php?List=ProgramLookUp |
| Target Latitude | TargetLatitude | Number | Represents the targeted latitude for the sample site in decimal degrees. Values of -88 or NULL indicate missing data. |
| Target Longitude | TargetLongitude | Number | Represents the targeted longitude for the sample site in decimal degrees (must be negative). Values of -88 or NULL indicate missing data. |
| Datum | Datum | Plain Text | Represents the associated model of the Earth from which reference points are used to calculate position measurements. GPS Devices commonly use Datums such as NAD83 and WGS84. Default value equals "NR" if unknown. |
| Station Description | StationDescr | Plain Text | Description of the StationCode. |

| | | | |
|---------------------------|------------------|------------|--|
| Agency Code | AgencyCode | Plain Text | Code that refers to the organization or agency that collected the sample. Default value equals "Not Recorded" if unknown. A list of possible options is available at: http://ceden.org/CEDEN_Checker/Checker/DisplayCEDENLookUp.php?List=AgencyLookUp |
| Agency Name | AgencyName | Plain Text | Name of the organization or agency that collected the sample. Default value equals "Agency Not Recorded" if unknown. A list of possible options is available at: http://ceden.org/CEDEN_Checker/Checker/DisplayCEDENLookUp.php?List=AgencyLookUp |
| SWRCB Waterbody Type Code | SWRCBWatTypeCode | Plain Text | Unique code assigned by the state for the appropriate waterbody type. Default value equals "NR" if unknown. A list of possible options is available at: http://ceden.org/CEDEN_Checker/Checker/DisplayCEDENLookUp.php?List=WbTypeLookUp |
| Location | Location 1 | Location | Latitude and longitude of the station. Values of -88 or NULL indicate missing data. |
